Parliamentarians for Global Action (PGA) is an organization that mobilizes parliamentarians to realize the goals of peace, democracy, the rule of law, and sustainable development, through our three programme areas. The organization currently consists of a global network of over 1,300 legislators from 117 countries. The themes of the Annual Forums focus on one programme, while integrating aspects of the two other programmes; this year's theme is directly linked to our Sustainable Development, Health and Population Programme (SDHP). **For more information about past fora, please check our website at: http://www.pgaction.org/about_annu.asp**
